

Are You Conducting Hybrid Cloud Business?

Hybrid Cloud represents the mixing of an on premises (private) datacenter with a public cloud - and numerous organizations have already found the benefits of moving their business to the cloud.

Additionally, with a reliable partner, you can save time and resources by properly scaling your operations within the cloud.

ACCORDING TO GARTNER AND IDC:

82%

of companies report hybrid cloud reduces IT costs and improves efficiency

80%

of enterprises report cost savings by adopting infrastructure as-a-service in hybrid cloud models

70%

of IT leaders say hybrid cloud enhances compliance and safeguards sensitive data

SAVE TIME AND MONEY WITH AS-A-SERVICE SOLUTIONS:

DEVICE-AS-A-SERVICE

Ensure that your employees have the latest devices to keep up with the increasing workloads that applications require

INFRASTRUCTURE-AS-A-SERVICE

Take the stress of managing cloud infrastructure away from your IT department, giving them time to focus on business-critical tasks

UNIFIED COMMUNICATIONS-AS-A-SERVICE

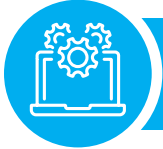

Keep your employees connected with collaboration software so they can work from anywhere

SECURITY-AS-A-SERVICE

Protect your valuable data from the increasing wave of cyber-attacks through real-time monitoring and threat response

4

Modern Solutions for the Hybrid Business Experience

MODERN APPLICATIONS:

Software to easily work and collaborate from anywhere

Zion Market Research reports that subscription-based solutions are expected to reach 10.5 billion by 2025. Adopting Software-as-a-Service (SaaS) solutions provide your organization a **predictable payment model and keeps your business running efficiently.**

MODERN INFRASTRUCTURE:

Cloud infrastructure to store data

Infrastructure-as-a-Service (IaaS):

- Allows for rapid response during periods of disruption
- Provides IT professionals with greater visibility into your network
- Saves IT professionals time while lowering your costs

MODERN COLLABORATION:

Software and hardware to communicate and work in real-time

Dimension Data shows that 71% of millennials said they face challenges with their professional collaboration tools compared to Generation Xers (62%) and baby boomers (45%). This underscores why businesses need to **modernize their collaboration software**, keeping employees connected across all devices.

MODERN SECURITY:

To protect critical business data from cyber-attacks

According to Fundera, 43% of cyber-attacks target small businesses and 60% of those that fall victim to an attack go out of business within six months. Leverage an intelligent solution that does it all for your organization - combining hardware, cloud, and as-a-service solutions.
